of Public Hospitals
and Health Systems

Overview of 2010-2015 DSRIP

David Lown, MD

CMO

California Health Care Safety Net
Institute

Overview of DSRIP & Public Health Care Systems (PHS)

- Five-year demonstration project to create enhanced health care systems (infrastructure, outpatient, inpatient, primary, and specialty care)
- 17 system DSRIP plans from 21 hospitals

Overview of Public Health Care Systems

21 county-owned and operated facilities and University of CA medical centers

- Serve over **2.85 million patients per year** with preventive, primary, specialty, pharmacy, emergency, and inpatient services
- Provide 40% of all hospital care to the state's uninsured
- Provide **10 million outpatient visits** per year
- Run more than $\frac{2}{3}$ of California's **burn centers**
- Operate more than half of California's top-level **trauma centers**
- Operate more than **100 outpatient primary and specialty clinics**
- **Train 57% of all new doctors** in the state
- Located in 15 counties, where more than 80% of CA population lives

History of DSRIP

- Acknowledgement by Obama Administration of inadequate funding for California's PHS
- No longer an era of pure subsidy
- \$ must be earned through systemwide delivery system reform
- Represents some new funding, some replacement funds for declining SNCP funds

History of DSRIP, cont.

- 12-19 simultaneous projects across settings; average: 15
- 217 milestones each year per system
- “Incentive” funding received only after:
 - Milestone achieved
 - IGT made from PHS (No State General Fund, incl funding for administration, personnel, evaluation)

DSRIP Structure

- Category 1: Infrastructure Development
- Category 2: Innovation & Redesign
- Category 3: Population-Focused Improvement
- Category 4: Urgent Improvements in Care
- Category 5: HIV Transition Projects (n=10)
