Notes: Any mental illness (AMI) is a categorization for adults 18 and older who currently have, or at any time in the past year had, a diagnosable mental, behavioral, or emotional disorder, regardless of the level of impairment in carrying out major life activities. This category includes people whose mental illness causes serious, moderate, or mild functional impairment. Serious mental illness (SMI) is a categorization for adults 18 and older who currently have, or at any time during the past year have had, a diagnosable mental, behavioral, or emotional disorder resulting in functional impairment that interferes with or limits major life activities. Serious emotional disturbance (SED) is a categorization for children 17 and under who currently have, or at any time during the past year have had, a mental, behavioral, or emotional disorder resulting in functional impairment that substantially limits functioning in family, school, or community activities. P stands for projections. All charts are California data except where noted.

CALIFORNIA HEALTH CARE FOUNDATION
Notes: Acute psychiatric beds exclude beds in California state hospitals. They include psychiatric units in general acute care hospitals (including city and county hospitals), beds in acute psychiatric hospitals, and beds in psychiatric health facilities.
