

Primary Palliative Care at California Public Hospitals: A Needs Assessment CO-ADVISER MEETING #3 DISCUSSION GUIDE & RECORD

Discussion Topics:

1. Select a Target Audience & Behavior

Suggested Discussion Prompts:

1. Discussion of Possible Quality Gaps
 - a. Review the quality gaps that you listed in your last meeting (Co-Adviser Meeting #2).
 - b. Have each adviser describe which quality gap feels most important to focus on and why.
 - c. Reflect on your Round 1 stakeholder interviews. Which gap did stakeholders feel was most important?

2. Select Target Audience & Behavior
 - a. Select one target audience and one behavior to focus on for the next step in your assessment.
 - b. Discuss your rationale for selecting this target audience and behavior. E.g. is this audience motivated to improve the identified quality gap? This this audience best trained or otherwise situated to address the quality gap?
 - c. Be very specific about who the audience is and what you want them to do.
 - d. If you are torn between two or more audiences or behaviors, it's fine to choose one to focus on for the next step. You can focus on another audience and behavior in a separate assessment.
