

Considerations for **PLANNING** your intervention

Consider.....	Description
Project Constraints & Opportunities	Leadership directed vs. self identified? Alignment with organization and/or department priorities?
Buy-In	From your leadership, department, learners, and <i>yourself</i> (your own passion)
Resources Required	Your own and others; clinician time, admin support, funding (now and in the future)
Risk & Strategy	Consider starting with some quick wins
Impact (vs. Feasibility)	What you can do vs. what will be important/useful
Timing	Long term vs. short term, alignment with other work
Staging	Consider a pilot, phases, start small, plan for rollout

What's your experience with these?

Considerations for **IMPLEMENTING** your intervention

Consider.....	Description
Evaluation/Metrics of Success	<ul style="list-style-type: none">• Structure/Process/outcome• From the beginning and continuous QI• Costs of Evaluation: who wants what?
Action Plan	<ul style="list-style-type: none">• SMART Goals• Timeline• Responsibilities (who does what)
Deliverables	
Communication Plan	

What's your experience with these?
