

Health Disparities, Medi-Cal Managed Care | A supplement to CHCF's *Health Disparities by Race and Ethnicity* available at www.chcf.org.

CALIFORNIA HEALTH CARE ALMANAC QUICK REFERENCE GUIDE

MAY 2024

California Health Care Foundation

Medi-Cal Managed Care Enrollment, by Race/Ethnicity, 2022

Notes: Data are as of June 2022. Figures may not sum due to rounding.

Cervical Cancer Screening, Medi-Cal Managed Care, by Race/Ethnicity, 2021

Notes: Percentage of women age 21 to 64 who were screened for cervical cancer. The rate for unknown/missing was 51.3%.

Antidepressant Medication Management, Acute Phase, Medi-Cal Managed Care, by Race/Ethnicity, 2021

Notes: Percentage of members age 18 and older who were treated with antidepressant medication, had a diagnosis of major depression, and who remained on an antidepressant medication for at least 84 days. The rate for unknown/missing was 69.6%.

Breast Cancer Screening, Medi-Cal Managed Care, by Race/Ethnicity, 2021

Notes: Percentage of women age 50 to 74 who had a mammogram to screen for breast cancer. The rate for unknown/missing was 49.9%.

Antidepressant Medication Management, Continuation Phase, Medi-Cal Managed Care, by Race/Ethnicity, 2021

Notes: Percentage of members age 18 and older who were treated with antidepressant medication, had a diagnosis of major depression, and remained on antidepressant medication for at least 180 days. The rate for unknown/missing was 56.0%.

Plan All-Cause Readmission, Medi-Cal Managed Care, by Race/Ethnicity, 2021

Notes: Percentage of acute inpatient hospital stays for members age 18 to 64 that were followed by an unplanned acute inpatient readmission for any diagnosis within 30 days of the initial admission. A lower rate indicates more favorable performance. MPL is not available. The rate for unknown/missing was 9.3%.

Legend: American Indian or Alaska Native (orange), Asian (teal), Black (blue), Latino/x (dark teal), Native Hawaiian or Pacific Islander (light teal), Other (grey), White (green)

Notes: Source uses *American Indian or Alaska Native*, *Black or African American*, *Hispanic or Latino*, and *Native Hawaiian or Other Pacific Islander*. The minimum performance level (MPL) is the 2021 National Committee for Quality Assurance Quality Compass national Medicaid 50th percentile for the Healthcare Effectiveness Data and Information Set Managed Care Accountability Sets indicators.

Timeliness of Prenatal Care, Medi-Cal Managed Care, by Race/Ethnicity, 2021

Notes: Percentage of live birth deliveries that received a prenatal care visit in the first trimester, on or before the enrollment start date, or within 42 days of enrollment in Medicaid/CHIP. The rate for unknown/missing was 89.5%.

Postpartum Care, Medi-Cal Managed Care, by Race/Ethnicity, 2021

Notes: Percentage of live birth deliveries that had a postpartum visit on or between 7 and 84 days after delivery. The rate for unknown/missing was 83.6%.

Child and Adolescent Health, Medi-Cal Managed Care, by Race/Ethnicity, 2021

	Developmental Screening in the First Three Years of Life	Child and Adolescent Well-Care Visits	Childhood Immunization	Adolescent Immunization
American Indian or Alaskan Native	20.4%	37.4%	23.7%	26.5%
Asian	36.2%	51.0%	56.4%	45.8%
Black	23.8%	40.2%	20.8%	29.2%
Latino/x	28.8%	49.3%	41.2%	42.5%
Native Hawaiian or Pacific Islander	27.6%	38.7%	32.8%	41.4%
Other	33.5%	46.9%	40.8%	31.9%
White	28.1%	40.6%	30.1%	26.7%
Unknown/Missing	24.9%	49.1%	31.1%	29.3%
Minimum Performance Level	n/a	45.3%	38.2%	36.7%

Notes: Developmental Screening in the First Three Years of Life is a composite score that measures the percentage of children who were screened for risk of developmental, behavioral, and social delay using a standardized screening tool in the 12 months preceding or on the child's first, second, or third birthday. Child and Adolescent Well-Care Visits measures the percentage of children age 3 to 21 years who had at least one comprehensive well-care visit with a primary care physician or an obstetrician/gynecologist practitioner. Childhood Immunization is Childhood Immunization Status - Combination 10 in the source and measures the percentage of children age 2 who had four diphtheria, tetanus, and acellular pertussis; three polio; one measles, mumps, and rubella; three haemophiles influenza type B; three hepatitis B; one chicken pox; four pneumococcal conjugate; one hepatitis A; two or three rotavirus; and two influenza vaccines by their second birthday. Adolescent Immunization is Immunizations for Adolescents - Combination 2 in the source and measures the percentage of adolescents age 13 who had one dose of meningococcal vaccine; one tetanus, diphtheria toxoids, and acellular pertussis vaccine; and the human papillomavirus vaccine series by their 13th birthday.

Notes: Source uses American Indian or Alaska Native, Black or African American, Hispanic or Latino, and Native Hawaiian or Other Pacific Islander. The minimum performance level (MPL) is the 2021 National Committee for Quality Assurance Quality Compass national Medicaid 50th percentile for the Healthcare Effectiveness Data and Information Set Managed Care Accountability Sets indicators.
